

FEATURE WRITING GUIDELINES FOR MANUFACTUR3D MAGAZINE INDIA'S FIRST ONLINE MAGAZINE ON 3D PRINTING

We always entertain intelligent opinions on 3D printing technology and would like to know more and learn from your area of expertise in the industry.

A feature article for Manufactur3D Magazine can include an article that identifies how 3D printing technology is affecting us now and may affect us in the future.

Ideally, a feature article for our magazine should include a broader or long-term view on the impact of how your particular subject matter may affect the 3D printing industry. However, any claims made should be backed up with evidence.

We normally prefer articles from those with established reputation and expertise in the 3D printing industry. However, we read all articles that are submitted to us and consider publishing it especially if it offers something new to our audience.

When submitting Feature Article

Please make sure that the article is a minimum of 500 words. Please include your short biography and include any other information such as your designation or any other information that can help us to know more about your experience and expertise in the 3D printing industry.

Important Note:

Any feature article submitted to Manufactur3D Magazine must be original and must not be used or already be published elsewhere.
