### **Joboshare iPhone SMS Transfer Crack + Free Download [32|64bit]**

Transfer audio and video files along with message from iPhones and iPods to the computer as a backup measure. Transfer messages to iTunes automatically or manually to the computer. Save all files, play them, and transfer them to other applications. Q: How to create a windowed utility from a windowed console application There is a console app which can be run as a win32 program. I have a function which opens a window and does some stuff in it, and then I need to call this function in my main app. The problem is that the program just exits when the main function is called. Here's my function: 

```
int WINAPI WinMain(HINSTANCE hInstance, HINSTANCE hPrevInstance, LPSTR lpCmdLine, int nCmdShow) { // this is the main app's function // but it fails, and it just exits. // the window's handle isn't found. OpenWindow(); MainApp(); return 0; } The OpenWindow function looks like this: void OpenWindow() { int client_id = 0; const int CS_VREDRAW = 0x0008; HWND hwnd = CreateWindow(CLASS_NAME, TEXT("Some text"), WS_CAPTION | WS_SYSMENU | WS_VISIBLE, 200, 200, 300, 300, NULL, NULL, hInstance, NULL); ShowWindow(hwnd, nCmdShow); UpdateWindow(hwnd); SetWindowLong(hwnd, GWL_STYLE, CS_VREDRAW); SetWindowPos(hwnd, HWND_TOPMOST, 0, 0, 0, 0, SWP_NOSIZE | SWP_NOMOVE | SWP_NOREDRAW | SWP_NOACTIVATE); client_id = RegisterWindow(hwnd, TEXT("Changeable window ID"),
```
